

Cookie Policy

Effective 6 October 2026 · The Loyalty Loop

1. What this policy covers

This Cookie Policy explains how The Loyalty Loop uses cookies and similar technologies on our website and mobile applications (the "Service"). It should be read with our Privacy Notice, which explains how we use personal data more generally.

Cookies are small files placed on your device when you visit a website. Similar technologies include browser local storage, which stores data in your browser for a similar purpose, and push-notification tokens in mobile apps. We refer to all of these as "cookies" in this policy. Some last only until you close your browser (session), and others stay until you delete them or they expire (persistent).

2. The categories we use

- **Essential.** Needed for the Service to work, so they do not need your consent. Our website uses browser storage to keep you signed in (provided by our authentication provider, Supabase) and to remember your cookie choice. Mobile apps store a sign-in session and, if you allow notifications, a push notification token. Essential storage cannot be switched off in our banner, but you can block it in your browser, which may stop sign-in from working.
- **Error monitoring.** We use Sentry to receive technical error reports so we can fix faults and keep the Service secure. It is configured not to collect personal data such as your email address, and it does not use advertising cookies.
- **Analytics (optional).** We use PostHog to understand how the website is used, such as pages viewed, so that we can improve it. This runs only after you choose "Accept all". PostHog stores a small identifier in your browser's cookies and local storage to recognise repeat visits and, when you are signed in, links activity to your account identifier (never your email address or name). We use the European Union cloud region, and we do not use session recording, advertising or cross-site tracking.
- **Maps and sign-in (third-party).** Features such as maps (Google) and sign-in with Google or Apple connect to those providers, who may set their own cookies or collect connection details under their own notices.

We do not use advertising or social-media tracking cookies.

3. Other technologies

- **Browser web storage (local storage)** holds your sign-in session, your cookie choice and some preferences. You can clear it in your browser settings.
- **Mobile SDKs and device identifiers.** Our apps use software libraries from our providers, for example for push notifications and sign-in, which may use device identifiers needed for those features to work.
- **Card linking.** Optional card linking opens Fidel's hosted enrolment form, which processes connection and device information under its own notice. The form has a separate card-linking consent; our cookie banner cannot grant it on your behalf, and choosing "Essential only" does not unlink an already linked card.

4. Your choices

- **Cookie banner.** The banner offers "Accept all" or "Essential only". Your choice is saved in your browser. Choosing "Essential only" switches off optional analytics. To change your choice, clear this site's stored data in your browser and choose again on your next visit; this may also sign you out. Different devices and browsers keep separate choices.
- **Browser settings.** Most browsers let you block or delete cookies. Please note that if you block essential cookies, parts of the Service may not work. For more information about managing cookies, see <https://www.aboutcookies.org>.
- **Do Not Track.** We do not currently respond to "Do Not Track" browser signals, but optional analytics only run if you accept them.
- **Notifications and marketing.** These are separate account controls and are not changed by the cookie banner. When card linking is available, use Linked cards to remove a card; clearing browser storage alone does not withdraw card-monitoring consent.

5. Changes to this policy

Information about the technologies we use may change from time to time. When it does, we will update this policy and its effective date, so please check back regularly.

6. Contact us

Questions about our use of cookies can be sent to help@the-loyalty-loop.com.
