

Data Processing Addendum

Effective 8 August 2026 · The Loyalty Loop

1. Purpose of this Addendum

This Data Processing Addendum ("DPA") applies where a business ("Merchant", "Controller") uses The Loyalty Loop ("Processor") to process personal data of its loyalty programme members ("Customer Personal Data") on the Merchant's behalf. It forms part of the Merchant Agreement between the parties and reflects the requirements of Article 28 of the UK/EU General Data Protection Regulation.

2. Subject matter and duration

The subject matter of processing is the provision of the Merchant Services described in the Merchant Agreement. Processing will continue for as long as the Merchant Agreement is in effect, and for a reasonable period afterwards as needed to return or delete Customer Personal Data in accordance with Section 7.

3. Nature and purpose of processing

We process Customer Personal Data to operate the loyalty programme the Merchant configures — recording stamps, points, and reward redemptions; enabling staff the Merchant has authorised to scan or look up customers; storing reviews and messages; and sending communications the Merchant requests, subject to each customer's own preferences.

4. Categories of data subjects and data

Data subjects are the Merchant's loyalty programme members. The categories of Customer Personal Data processed typically include name, email address, phone number, a unique loyalty code, transaction and visit history, reward status, and any review content or messages the customer submits in relation to the Merchant's shop.

5. Processor obligations

- Process Customer Personal Data only on the Merchant's documented instructions, as reflected in the configuration and features the Merchant selects, unless required to do otherwise by law.
- Ensure personnel authorised to process Customer Personal Data are subject to confidentiality obligations.
- Implement appropriate technical and organisational security measures, including access controls enforced at the database level, encryption of stored credentials such as staff PINs, and role-based permissions for staff scanning and redemption actions.
- Assist the Merchant, where reasonably possible, in responding to data subject requests and in meeting its obligations relating to data protection impact assessments and consultations with regulators.
- Notify the Merchant without undue delay after becoming aware of a personal data breach affecting Customer Personal Data.

- At the Merchant's choice, delete or return Customer Personal Data at the end of the provision of Merchant Services, except where retention is required by law.
- Make available information reasonably necessary to demonstrate compliance with this DPA and allow for audits, including inspections, conducted by the Merchant or an auditor it appoints, subject to reasonable notice and confidentiality.

6. Sub-processors

The Merchant authorises The Loyalty Loop to engage sub-processors to provide the Merchant Services, including our cloud database, authentication, and storage provider; our transactional email provider used for win-back and receipt-style emails; and, only where the Merchant actively enables them, optional AI-assisted analytics or research features. We remain responsible for our sub-processors' compliance with data protection obligations equivalent to those in this DPA, and we will give the Merchant reasonable notice of any intended change so it may object on reasonable grounds.

7. International transfers

Where a sub-processor is located outside the UK or EEA, we ensure an appropriate transfer mechanism is in place, such as standard contractual clauses or an adequacy decision.

8. Liability

Each party's liability under this DPA is subject to the limitations of liability set out in the Merchant Agreement.
