

Cookie Policy

Effective 6 October 2026 · The Loyalty Loop

1. What cookies are

Cookies are small text files placed on your device when you visit a website or use an app. Similar technologies include local storage and push-notification tokens, which we refer to collectively as "cookies" in this policy.

2. The categories of cookies we use

Essential browser storage keeps you signed in and remembers your privacy choice. Optional usage analytics record activity such as event name, page context and your signed-in account identifier when you choose Accept all. Essential only disables these optional usage events. These records are not anonymous because they can be associated with your account. On our website they are collected using PostHog, which acts as our service provider and stores the data in its European Union cloud region. PostHog stores a small identifier in your browser's local storage and cookies to recognise repeat visits, only after you choose Accept all. We do not send your email address or name to PostHog, and we do not use PostHog session recording, advertising or cross-site tracking. You can change your choice at any time by clearing this site's stored data, which shows the banner again.

Card-linked purchase and refund records are used to operate rewards under the Privacy Notice. They are separate from optional website usage analytics. Accepting cookies does not authorise card enrolment or transaction monitoring; choosing Essential only does not unlink an already linked card.

3. Managing your preferences

The banner offers Accept all or Essential only. Your choice is saved in browser local storage for that browser. To reset it, clear this site's stored data in your browser and choose again on your next visit; this may also sign you out. Different devices or browsers keep separate choices.

Notification and marketing preferences are separate account controls. When card linking is available, use Linked cards to remove a card; clearing browser cookies alone does not withdraw card-monitoring consent.

4. Third-party cookies

Features such as authentication, maps and bot protection can connect to third-party services. If you choose Accept all, optional usage analytics on our website are sent to PostHog (PostHog Inc.), which sets the browser storage described above. Optional card linking opens Fidel's hosted enrolment form, which also processes connection and device information under its own notice. Review the terms and privacy information in that form before enrolling. The form has a separate card-linking consent; our cookie banner cannot grant it on your behalf.

5. Changes to this policy

We may update this Cookie Policy from time to time to reflect changes in the technologies we use. We will update the effective date at the top of this document when we do.

6. Contact us

Questions about our use of cookies can be sent to developer@the-loyalty-loop.com.
