

Acceptable Use Policy

Effective 23 September 2026 · The Loyalty Loop

1. Purpose

This Acceptable Use Policy explains what you must not do when using The Loyalty Loop. It applies to every account holder — customers, business owners, staff, and administrators — and forms part of our Terms of Service.

2. Prohibited activities

You must not:

- Attempt to claim, award, or redeem stamps, points, or rewards you are not genuinely entitled to, including by sharing, guessing, or brute-forcing another customer's loyalty code or QR code.
- Create multiple accounts to abuse sign-up rewards, the referral programme, or a shop's loyalty programme.
- Use automated means (bots, scrapers, or scripts) to access the Service, extract data, or interact with shops or other users, except where we have explicitly permitted this.
- Attempt to circumvent rate limits, security controls, or access restrictions built into the Service.
- Access or attempt to access another user's account, or any part of the Service you are not authorised to use, including as a staff member acting outside your granted permissions.
- Submit reviews, replies, announcements, or messages that are false, defamatory, harassing, hateful, obscene, or otherwise unlawful.
- Upload malicious code, or content that infringes someone else's intellectual property or privacy rights.
- Use the Service to send unsolicited marketing to people who have not consented to receive it.
- Reverse-engineer, decompile, or attempt to extract the source code of the Service, except where permitted by law.
- Use the Service in any way that could disable, overburden, damage, or impair it, or interfere with any other party's use of it.

3. Business owner and staff responsibilities

Business owners are additionally responsible for the actions of staff accounts they create, and must revoke a staff member's access promptly once that person is no longer authorised to act on the business's behalf. Staff members must only scan, redeem, or respond to reviews within the permissions granted to them, and must not share their password or PIN with anyone else.

4. Reporting a problem

If you believe someone is misusing the Service, or you have found a security issue, please contact us at developer@the-loyalty-loop.com as soon as possible so we can investigate.

5. Consequences of breach

We may remove content, suspend or restrict features, or terminate accounts that breach this policy, with or without notice depending on the severity of the breach. We may also take legal action or report unlawful activity to the relevant authorities where appropriate.

6. Changes to this policy

We may update this policy from time to time. Continued use of the Service after an update takes effect means you accept the revised policy.

7. Card-linked rewards and transaction data

Do not link a card without authority, attempt to claim another shopper's card, falsify merchant enrolment permission or submit misleading payment or refund records. Do not seek duplicate credit through both card-linked and manual entries, bypass manual-entry limits, or exploit refund timing to redeem rewards you are not entitled to.

Use member and transaction data only for authorised loyalty operations. Do not extract card-linked data for unrelated profiling, sell it, or request full card numbers or security codes through messages, support tickets or staff forms. Report suspected matching errors to support.
