

Cookie Policy

Effective 23 September 2026 · The Loyalty Loop

1. What cookies are

Cookies are small text files placed on your device when you visit a website or use an app. Similar technologies include local storage and push-notification tokens, which we refer to collectively as "cookies" in this policy.

2. The categories of cookies we use

Essential browser storage keeps you signed in and remembers your privacy choice. Optional usage analytics record activity such as event name, page context and your signed-in account identifier when you choose Accept all. Essential only disables these optional usage events. These records are not anonymous because they can be associated with your account.

Card-linked purchase and refund records are used to operate rewards under the Privacy Notice. They are separate from optional website usage analytics. Accepting cookies does not authorise card enrolment or transaction monitoring; choosing Essential only does not unlink an already linked card.

3. Managing your preferences

The banner offers Accept all or Essential only. Your choice is saved in browser local storage for that browser. To reset it, clear this site's stored data in your browser and choose again on your next visit; this may also sign you out. Different devices or browsers keep separate choices.

Notification and marketing preferences are separate account controls. When card linking is available, use Linked cards to remove a card; clearing browser cookies alone does not withdraw card-monitoring consent.

4. Third-party cookies

Features such as authentication, maps and bot protection can connect to third-party services. Optional card linking opens Fidel's hosted enrolment form, which also processes connection and device information under its own notice. Review the terms and privacy information in that form before enrolling. The form has a separate card-linking consent; our cookie banner cannot grant it on your behalf.

5. Changes to this policy

We may update this Cookie Policy from time to time to reflect changes in the technologies we use. We will update the effective date at the top of this document when we do.

6. Contact us

Questions about our use of cookies can be sent to developer@the-loyalty-loop.com.
